

New Mexico
Clean Fuel Coalition

It's a big
win for
New Mexico.

Reduce air
pollution.

Fight
climate
change.

The Economic Benefits of a Clean Transportation Fuels Standard

The Clean Transportation Fuels Standard would provide a number of economic benefits for our state.

- Create over 1,500 new high-paying permanent jobs
- Create over 2,300 construction jobs by 2030
- Generate \$470 million in wages in the next decade
- Attract \$240 million worth of economic investments in New Mexico's low-carbon transportation fuel production and delivery infrastructure
- Attract new alternative fuel producers to set up in our state, making New Mexico a leader in new sources of transportation fuel
- Establish a credit market to reward companies that produce low-carbon transportation fuel
- Raise funds to build and maintain a new system of electric charging stations
- Spur investment in clean fuel technology in New Mexico, like bio- and renewable diesel, renewable natural gas, and clean hydrogen
- New Mexico will become a leader in production of low carbon fuels while diversifying its energy economy and attracting new clean energy jobs
